

## More Than Service...

ABM is also the distributor and installer for Interlube auto-lube systems. These auto greasers and oilers can be installed on your equipment and chassis to provide you with piece of mind that your equipment is receiving the grease or lubrication it needs on a regular basis. Ask us today about an auto-lube system for your equipment or vehicle.

## Our History

Since 1980 ABM Equipment has been servicing and building custom truck equipment. With full shop services and equipment design using the latest .CAD software and years of experience we stand ready to layout your new equipment ideas. Over the years many customers have relied on ABM for specialty projects and prototype ideas and we always welcome the task. Call us today for your equipment needs.

## Maintenance Products

At ABM Equipment we not only talk about maintenance, we sell it! From our new showroom where you can find maintenance products from fiberglass cleaners and waxes to grease guns and filter kits. We also offer hydraulic oil testing with full analyzed report. Stop in to pick up your maintenance supplies today.

# At ABM Equipment & Supply...Service is our success

ABM Equipment & Supply's Service Guard maintenance programs are designed to avert problems before they arise. This helps avoid major breakdowns, extend the life of your equipment and keep down time to a minimum by investing in our comprehensive service plan designed to fit your needs.

There are many benefits to your company by implementing a strong maintenance program. By knowing maintenance costs you can make better asset management decisions by knowing your overall equipment costs. Some of the services that we provide are as follows—

## Annual Inspections

ABM Equipment provides certified annual inspections to keep your equipment in compliance, giving you piece of mind to focus on your work at hand. We offer these services in house and on the road through our Service Guard program. We can inspect all makes and models of equipment in our related fields and provide you a full report upon completion.

### Annual Inspections for all Makes of Equipment

- Aerial Devices (insulated & non-insulated)
- Digger Derricks
- Accessories (bucket liners, tools, hot sticks)
- Knuckle Booms
- Loader Cranes
- Boom Trucks
- Service Cranes
- Truck Mounted Forklifts
- Rail Gear (inspection and alignment)
- Chassis DOT Inspections

## Dielectric Testing

ABM Equipment & Supply provides up to date and comprehensive Visual and Operational inspections per the ANSI A92.2-2009 standard.

Our skilled and highly qualified technicians can perform, per ANSI standards, dielectric testing services at your location or ours. Testing with up to 100 kV (DC) is applied to your fiberglass boom, extensions, jibs and basket liners. We provide a detailed report of completed inspections as well as the priority of any problems found. We mail or email your hard copy of the inspection reports to you as well as keep a copy on file.

We also have the ability to make necessary repairs at the time of the inspection or schedule it for a later date to keep your equipment in service.
